CASE STUDY

False Creek Harbour Authority Floating Breasting Log

FALSE CREEK, CANADA

APPLICATION: PORTS AND MARINAS

Pacific Netting Products designed and manufactured a 36" diameter x 190' floating HDPE breasting log for a commercial dock in False Creek, Canada. It was manufactured with an 18" steel galvanized walkway perf-o-grip safety grating and ballasted with heavy gauge anchor chain for added stability. The floating breasting log provides strength and stiffness while dissipating berthing energies along its length.

INSTALLATION FEATURES

- Designed for grounding and varying tide fluctuations
- Abrasion, UV, and impact resistant
- 100% watertight for a 50-year service life
- Fully customizable
