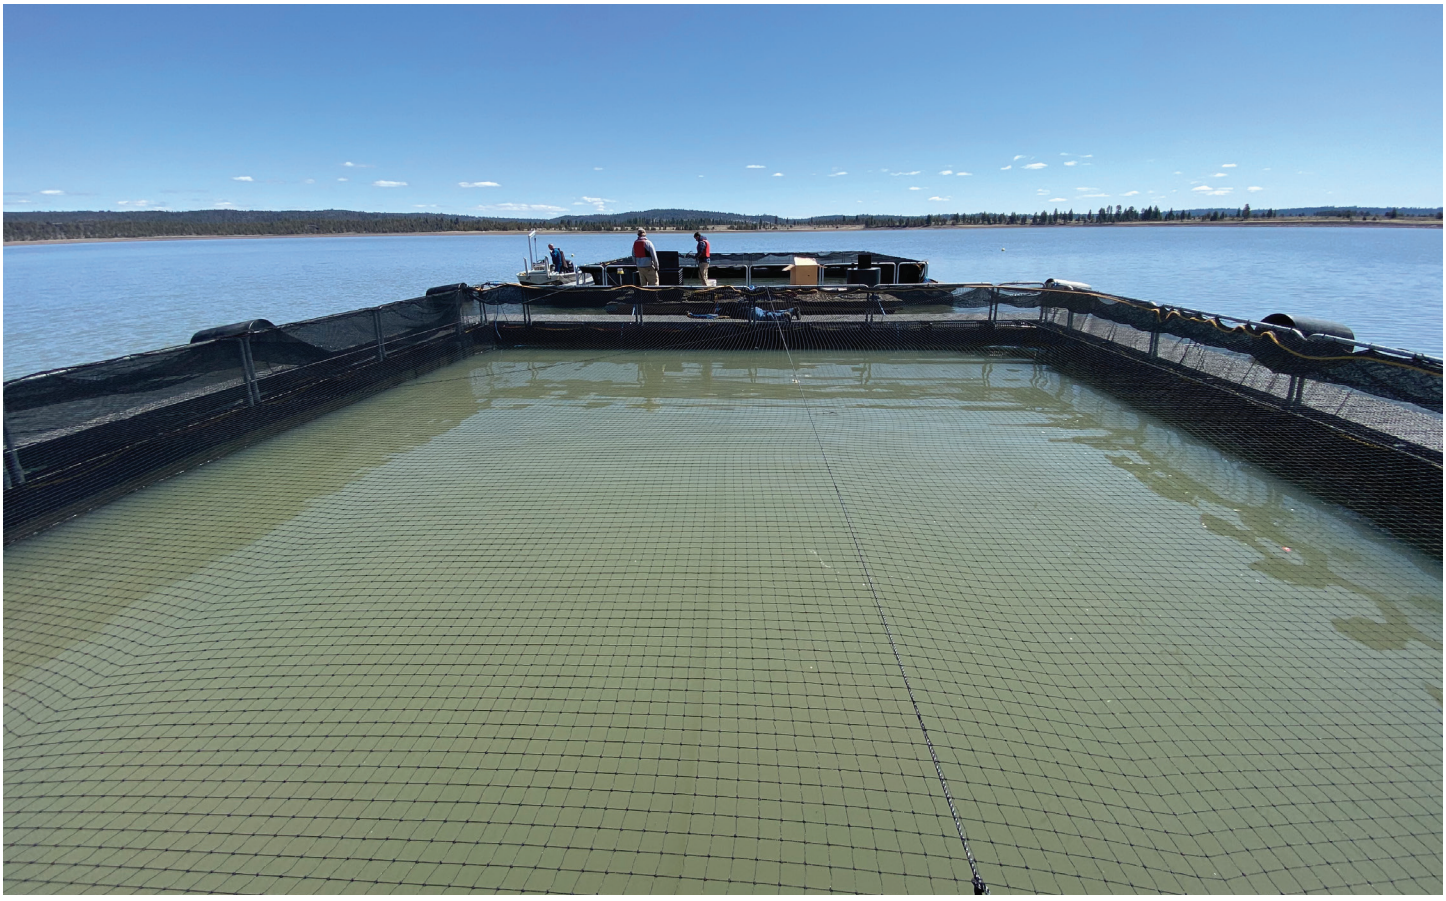
CASE STUDY

U.S. Fish and Wildlife Service
Gerber Reservoir Bird Deterrent Netting

KLAMATH FALLS, OREGON

APPLICATION: AQUACULTURE NETTING

Pacific Netting Products was contracted by the U.S. Fish and Wildlife Service to design and manufacture two submersible net pens within Gerber Reservoir. The objectives of the net pens were to increase capacity and acclimate juvenile suckers to natural conditions prior to release. PNP constructed a removable bird deterrent as part of the net pen design, which featured a commercial grade marine zipper for security and easy access.

INSTALLATION FEATURES


- Includes removable top netting panel
- Top panel installed with commercial grade HD marine zipper with sliders
- 1½" x 1½", 380 27-ply polyethylene bird deterrent net
