CASE STUDY

Cove Marina
Floating HDPE Wave Attenuator

LAKE CHELAN, WASHINGTON

PNP
PACIFIC NETTING PRODUCTS
INCORPORATED

APPLICATION: PORTS AND MARINAS

Pacific Netting Products designed and manufactured a 450′ custom HDPE floating wave attenuator to prevent dock and boat damage resulting from boat wakes and wave energies.

INSTALLATION FEATURES

- Steel chain and water ballasted HDPE pontoons
- 36″ diameter foam-filled HDPE boom
- 100% watertight for a 50-year service life
- Splash guard provided additional protection against high energy at the water's surface
- Equipped with solar and navigation lighting and signage
